

THINK MEASLES

● What is it?

Measles is an infectious virus that causes a rash, can be very serious and is **on the rise**.

It can be more severe and longer lasting in adults.

It is a major risk to pregnant women, babies and those with a weakened immune system.

Anyone who has not had measles or received 2 vaccinations against measles could catch it.

● What to look for

If you have a high fever, cough, sore eyes and rash, **THINK MEASLES**.

● What to do

If you have any symptoms, had contact with someone who has measles or travelled abroad, inform a member of staff **now**.

THINK
MEASLES
