

## East Riding Integrated Neighbourhood Teams (INTs)

---

### Beverley

**Neighbourhood:** The Beverley INT encompasses the residents of the Towns of Beverley and Cottingham.

---

**Meetings:** To be confirmed

---

**Approaches:** Three approaches currently being considered:

- Learning Disability Health Checks – What, if any, barriers are there that is limiting the attendance of this cohort attending for their health checks?
  - Travelling Community – Access to healthcare.
  - High attendance at practices (worried well) - to enable patients to feel supported and confident in their health and reduce the need to attend surgery.
- 

**Cohorts Supported to Date:**

- Travelling Communities – A member of the working group exploring how to improve access to services.
- 

**Beverley Data and Insight:** Beverley INT is part of the Beverley Primary Care Network footprint. You can access data and insight about the area here: [East Riding PCNs](#)
