

East Riding Integrated Neighbourhood Teams (INTs)

Holderness

Neighbourhood: The Holderness INT encompasses the whole of the Holderness area.

Meetings: Currently being reviewed.

Approaches: Initial pilot trialled a focus of integrated working focussing on a broad group of patients causing concern. Several cohorts were trialled at subsequent meetings following this, including children and young people, frequent attenders and working age adults currently signed off sick. Following review it was felt the pilot had not gained traction and we are now in the process of scoping a team around a palliative cohort, building on work already started.

Cohorts Supported to Date:

- As above
-

Holderness Data and Insight: Holderness INT is part of the Holderness Primary Care Network footprint. You can access data and insight about the area here: [East Riding PCNs](#)
